 - (c) Money is not the only way we are being controlled by Mr Global
 - i. Mind Control with Entrainment. Catherine pointed out that even if people own Bit-Coin, if they get the vaccine, they are not Sovereign individuals.
 - A. Use example with CBDC.
 - ii. Are Bit-Coin people working on being Food and Energy Independent. If you have Bit-Coin but no food, you are not Sovereign.
 - iii. Mr Global might actually like having Bit-Coin around.
2. My view on Bit-Coin:
 - (a) Aleksander Svetski feels safe since he memorized his Bit-Coin key. I Think it gives the

- government an invitation to torture him. At the very least, the government can put him in jail and he won't have access to his money.
- (b) As a programmer for 25 years, I can tell you it is impossible to scientifically prove that a program is 100% bug free.
 - (c) Very well put together. I would use it in certain situations, but you cannot say it is fault free.
 - (d) I would also use the decentralized internet, but again you can not declare it is bug free.
3. Other forms of currency [WE NEED MORE THAN ONE OPTION].
- (a) Is a local currency possible? Aleksander Svetski thinks no. Catherine thinks yes. For me the jury is out until I see what people around the world have done with local currency.
 - (b) Barter.

- (a) Refrigerated food spoils.
 - (b) People buy out all non-perishable food at the store.
